

Wedge IT LE (Lighter Framed Wedge Welder)

Fig 1

Introducing the latest in wedge welder technology. The Wedge IT LE wedge welder has a much lighter frame than other conventional wedge welders. The cutting edge in wedge welder technology and design.

Its unique features include:-

- Rack & pinion wedge movement
- Light weight aircraft aluminium frame
- Digital readout for pinpoint temperature and speed adjustments
- High torque industrial brushless motor
- Easy to use presets for material thickness

Its unique design allows for complete access to the wedge - which can be changed by removing a single bolt. (See Fig. 1)

The Wedge IT LE wedge welder will weld :

- PP
- HDPE
- LDPE
- PVC GEOTEXTILE

Technical Specification:-

- Material Size: 0.5 to 2.5mm
- Maximum Temperature: 450°C
- Voltage: 230v only
- Weight: 16 Kilos (30lb)

The Wedge IT LE wedge welder for joining and welding flexible plastic membrane linings For land lining and pond lining , geomembranes and geotextiles - contact us for further information
